Data Analytics Course Program

Program Highlights

Top-Notch Faculty

Trainers at ExcelR are passionate about training, and carry 12+ years of industry experience.

Exhaustive Course Curriculum

Our industry-relevant course curriculum is tailored to provide practical exposure with the theory.

Real-life Projects and Bootcamps

Learners will work on real-life data analytics scenarios from various domains to get application knowledge.

Job Readiness

Intensive interview preparation from Day 1 to prepare candidates for interviews with our network of 2000+ hiring partners.

Who Should Do The Data Analyst Course?

Skills Covered

Tools and Technologies

Excel
(Basic & Advanced)

MySQL

Tableau

Power BI

Business Statistics

Python & R
Programming

Large Language
Models (LLM) & ChatGPT

SAS (Self Paced)

Course Title: Data Analytics Course

Course Duration: 3 Months

Course Description:

Unlock the power of data with our Comprehensive Data Analytics Bootcamp, a 3-month intensive program designed to equip participants with a robust skill set in data analytics using essential tools such as Python, SQL, Excel, Tableau, and Power BI. This hands-on course is structured to guide you through the intricacies of data manipulation, analysis, and visualization, providing a solid foundation for a successful career in the dynamic field of data analytics.

Week 1-2: Foundations of Data Analytics

Week 1: Introduction and Basics

Day 1-2: Course Overview, Introduction to Data Analytics

Day 3-5: Basics of Statistics for Data Analytics

Day 6-7: Overview of Data Analytics Tools (Excel, Python, SQL, Tableau, Power BI)

Week 2: Data Manipulation with Excel and SQL

Day 8-10: Data Cleaning and Preprocessing with Excel

Day 11-14: Introduction to SQL for Data Analysis

Day 15-16: Combining Data with SQL Joins

Week 3-4: Python for Data Analysis

Week 3: Basics of Python

Day 17-19: Introduction to Python and Jupyter Notebooks

Day 20-22: Python Libraries for Data Analysis (NumPy, Pandas)

Week 4: Advanced Python for Data Analysis

5

Day 23-25: Data Visualization with Matplotlib and Seaborn

Day 26-28: Exploratory Data Analysis (EDA) with Python

Day 29-30: Final Project - Data Analysis with Python

Week 5-6: SQL and Advanced Excel

Week 5: Advanced SQL and Database Connectivity

Day 31-33: Advanced SQL Queries and Subqueries

Day 34-36: Connecting Python with Databases

Day 37-38: SQL Case Study

Week 6: Advanced Excel

Day 39-41: Advanced Excel Functions and Formulas

Day 42-44: PivotTables and Power Query

Day 45-46: Excel Case Study

Week 7-8: Data Visualization with Tableau and Power BI

Week 7: Tableau Fundamentals

Day 47-49: Introduction to Tableau

Day 50-52: Building Basic Visualizations in Tableau

Day 53-54: Tableau Case Study

Week 8: Power BI Fundamentals

Day 55-57: Introduction to Power BI

Day 58-60: Building Reports and Dashboards in Power BI

Day 61-62: Power BI Case Study

Week 9-10: Advanced Topics in Data Analytics

Week 9: Machine Learning with Python

Day 63-65: Introduction to Machine Learning

Day 66-68: Supervised Learning with Scikit-Learn

Day 69-70: Machine Learning Case Study

Week 10: Advanced Data Analytics Techniques

Day 71-73: Time Series Analysis

Day 74-76: Advanced Data Visualization Techniques

Day 77-78: Mock Interview Preparation

Week 11-12: Capstone Project and Interview Preparation

Week 11: Capstone Project

Day 79-81: Capstone Project - Comprehensive Data Analysis

Day 82-84: Project Presentation and Feedback

Week 12: Interview Preparation and Mock Interviews

Day 85-87: Resume Building and LinkedIn Profile Optimization

Day 88-90: Mock Interview Sessions and Feedback

Day 91-92: Final Review and Course Recap

WHAT YOU COULD BECOME:

Tech job landscape is lucrative, dynamic, and ever-growing. The roles that are database administrator development are also highly diverse.

- Data Analytics
- Data Analyst
- Business Intelligence Analyst
- Market Research Analyst
- Financial Analyst
- Healthcare Data Analyst
- Operations Analyst
- Fraud Analyst
- Supply Chain Analyst
- Business Analyst
